

Sprint 2 Plan

- Product Name: Neat Tabs
- Team Name: Tab-o-Rama
- Sprint Completion Date: Friday, November 4, 2016
- Revision Number: 1
- Revision Date: Thursday, October 20, 2106

Goal

- Extend functionality of our already existing features (save by windows, restore specific tabs, etc.)
- Working more on visualizing all the information we collect and presenting it
- Expand more on be able to manipulate group domains.

User Stories

- (8)[24.5 hours] As a user, I want to see and visualize the different websites I spend my time on with a user-specified (daily, weekly, etc.) basis
 - Create a function to track the amount of time spent on the active tab.(10 hours)
 - Create a function to extract domains from user history to populate our set of domains to track.(10 hours)
 - Create a model that best keeps track of our information (most likely local storage).(2 hours)
 - Create a datatype (array/dictionary) to store the domains that we are tracking.(.5 hours)
 - Create a list of to n domains listing time spent on each.(2 hours)
- (8) [21 hours] As a user, I want to be able to group together certain domains/tabs that have similar uses to me ({Netflix,YouTube} versus {ecommons, my.ucsc.edu}) - Tree View
 - Restructure our logic to return tabs open in each window rather than all open tabs across all windows.(8 hours)
 - Sort (alphabetical) saved sessions (3 hours).
 - Drop down logic.(4 hours)
 - Only group certain domains that the user would like to see instead of all the sites (6 hours)

Team Roles

Gerardo Espinoza [Developer]
Sean Elliott [Scrum Master]
Arthur Chiao [Developer]
Richa [Product Owner]

Task Assignment
