

Acceptance Criteria

Sprint 1: 5 stories

As a user, I want to be able to group together certain domains/tabs that have similar uses to me ({Netflix,YouTube} versus {ecommons, my.ucsc.edu}) - Tree View

- Specify the groups that I want and the domains that belong in the groups.
- View these groups later on for editing/etc.
- Open a set of domains/urls on queue.

As a user, I want to be able to save and restore tabs/sessions so that I can keep them organized.

- Save all tabs/sessions in storage.
- View these tabs/sessions in some list form.

As a user, I want to be able to easily aggregate all my open links in one central location.

- View the titles/urls of all my tabs in one central location.
- Easily access this at a click.

As a user, I want a nicely designed interface that is appealing to the eye so I can navigate the extension intuitively with little problem.

- Simple pull down menu with the menu of options, laid out in an intuitive manner
- Have well designed colors that indicate different aspects of the menu.

As a user, I want to be able to save entire windows (and all tabs within) as a session and label it.

- Save my session at the click of a button
- Label session for ease of viewing/indication of the purpose of that session.

Sprint 2: 4 stories

As a user, I want to see and visualize the different websites I spend my time on with a user-specified (daily, weekly, etc.) basis.

- Track and manage time spent on active pages starting with the downloading of the extension.
- Be able to track/select time in different increments.
- View breakdown of my time spent on my most visited websites.

As a user, I want to be able to group together certain domains/tabs that have similar uses to me ({Netflix,YouTube} versus {ecommons, my.ucsc.edu}) - Tree View

- **[Defined in Sprint 1]**

As a user, I want to be able to choose what tabs to save or exclude without having to close any of my open tabs.

- Create a button/selector to flag a tab for inclusion or exclusion in a save of a session.
- Attach this button to the table maintaining our current tabs, indicating whether a tab will be saved or not.

As a user, I want to be able to see previous sessions that are not active anymore.

- View recently closed tabs/sessions
- Be able to restore old sessions/tabs that I choose
- View history spanning back a certain amount of time

Sprint 3: 3 stories

As a user, I want to be able to easily find and install this app.

- Upload version 1.0.0 of our extension on the Chrome Web Store
- Have the extension visible to the general public

As a user, I want to see and visualize the different websites I spend my time on with a user-specified (daily, weekly, etc.) basis.

- **[Defined in Sprint 2]**

As a user, I want to be able to group together certain domains/tabs that have similar uses to me ({Netflix, Youtube} versus {eCommons, my.ucsc.edu})

- **[Defined in Sprint 1]**
