

# Sprint 3 Plan

- Product Name: Neat Tabs
- Team Name: Tab-O-Rama
- Sprint Completion Date: Friday, November 4, 2016
- Revision Number: 1
- Revision Date: November 3, 2106

## Goals

- Extend functionality of our already existing features (save by windows, restore specific tabs, etc.)
- Adding basic options to our application
- Visualize our data (tentatively)
- Publishing our app on the Chrome web store
- Conducting unit tests
- Add extensive documentation

## User Stories

- As a user, I want to be able to easily find and install this app
  - (4 hours) Publishing our application on the Chrome web store
- (8) As a user, I want to see and visualize the different websites I spend my time on with a user-specified (daily, weekly, etc.) basis
  - (10 hours) Create a model that best keeps track of our information (most likely local storage). [Richa]
- (8) As a user, I want to be able to group together certain domains/tabs that have similar uses to me ({Netflix, YouTube} versus {ecommons, my.ucsc.edu})
  - Restructure our logic to return tabs open in each window rather than all open tabs across all windows (8 hours) [Arthur][Gerardo]
  - Sort (alphabetical) saved sessions (3 hours)[Gerardo, Sean]
  - Only group certain domains that the user would like to see instead of all the sites (6 hours) [Sean]

## Team Roles

Gerardo Espinoza [Developer]  
Sean Elliott [Developer]  
Arthur Chiao [Scrum Master]  
Richa [Product Owner]

## **Task Assignment**
